If there are several church or school communities in one political municipality, the church and/or school community of the same name is used for the calculation. This is why your actual tax amount may vary from the result. The tax for fire brigade was not considered in the calculation.

* In the comparison of municipalities from different cantons, deductions for children, work-related expenses and other general deductions are taken into consideration according to the applicable cantonal tax laws. The amount of your taxable income only applies to the current place of residence (see calculation basis), and not the municipality that is being compared, as it would be different in each canton.

For every canton, the deductions from taxable income specific to that canton are taken into account. The result therefore depends on the municipality that forms the basis for the comparison. If you reverse the comparison, the calculation will be different, resulting in different tax amounts.
